

Microsoft (C#) Web Platform (Framework) Developer

Job Specification

Peresys is looking for an experienced and talented Microsoft Web Developer/Architect to work on our Core components and platforms. You will be hands on in developing core platform components and architecting solutions around them.

Peresys offers you an opportunity to :

- Learn the inner workings of the stock market - how it works, what traders actually do and the technical building blocks that holds it all together behind the scenes
- Gain Knowledge of real-time software development, back end API's and data management functions
- Explore concepts of multithreading, data persistence strategies, network communications, UI building, componentised development, design patterns and many other aspects of object oriented software development

Key Responsibilities

You will be required to:

- Develop new components and maintain existing code using our internal frameworks in C#
- Develop and maintain code for the internal C# web facing frameworks
- Develop a Platform and Framework architecture
- Develop and maintain web applications which interface to time critical real-time systems
- Work with business teams around implementing applications on the core platforms
- Define internal and external facing API strategies
- Interact with QA surrounding testing, deployment and building processes
- Be involved in decisions surrounding platform direction

Skills and Experience Required

Must have experience in:

- Multitiered (3+ tier) applications
- C# and .Net Framework (3.5 +)
- ASP.NET Web Applications
- Strong Javascript skills and Ajax
- SQL and relational databases, especially SQL Server
- Designing and Architecting systems
- Framework and Component development

Experience in the following will be beneficial:

- Entity framework and Linq
- Financial Markets
- DevExpress

- JQuery
- Silverlight
- Comet
- Security

Must have an IT Degree or Diploma

Reporting Lines

You will report to the Head of Dev. A core platform team is being formed to look after platforms in the company.

We employ people who are passionate, motivated, and talented. You must be a team player, calm under pressure and have a positive influence on those around you.

If you have at least 6 yrs experience in web application development in Microsoft technologies and would like to work in a dynamic, entrepreneurial environment that rewards you for above average performance, apply today!
